

# Reece Boston, Ph.D. Physics

numerical astrophysics researcher

seeking complex coding challenges

tel: [770.355.0261](tel:770.355.0261)

email: [reece@thebostons.us](mailto:reece@thebostons.us)

github: [rboston628](#)

linkedin: [reece-boston](#)

---

• C++ (>10yr)

• R (>10yr)

• python (3yr)

• Misc.: SQL, git, GNU/Linux, bash, fortran, Java, HTML, Objective-C, x86 assembler.

---

## Work Experience

**Scientific Software Engineer** at ORNL, Mar 2023 - present

- design, build, test, and document code base for neutron scattering data reduction

Technology: C++; python; AGILE.

**Quant Researcher** at [Anchorage Digital](#), Oct 2022 - Mar 2023

- analyze cryptocurrency market liquidity

Technology: python; Google Cloud; BigQuery.

**R&D Data Scientist** at [Community](#), Sept 2021 - June 2022

- analyze big data for product insights using causal inference and market archotyping

Technology: python [pandas, numpy, sklearn, spaCy]; github; Snowflake SQL; Docker; AWS.

**Research Assistant** at University of North Carolina, Fall 2016 - Spring 2022

- conducted scientific research leading to original publications
- created original research code in C++ within Linux environment using GNU tools

Technology: C++ [gcc, STL, MPI multithreading, make]; bash scripting; github; fortran.

## Research Codes

[GRPulse](#): High-precision asteroseismology code for Newtonian and relativistic stellar models.

[Thrain](#): Astrophysics code to create simple white dwarf stars.

---

## Research Publications

- Alejandro H. Córscico, [S. Reece Boston](#) et al, “General relativistic pulsations of ultra-massive ZZ Ceti stars,” MNRAS, [sub. June 1, 2023].
  - Boston, S. Reece, C. R. Evans and J. C. Clemens, “Relativistic Corrections in White Dwarf Asteroseismology.” Astrophysical Journal, [acpt. May 9, 2023].
  - Boston, S. Reece, *Newtonian and Relativistic White Dwarf Asteroseismology*, [Ph.D. dissertation](#), UNC, (2022).
  - de Souza, Rafael, [S. Reece Boston](#), Alain Coc, and Christian Iliadis, “Thermonuclear fusion rates for tritium+deuterium using Bayesian methods.” [Physical Review C](#), (2018).
  - Boston, S. Reece, “Time travel in transformation optics.” [Physical Review D](#), (2015).
- 

**Ph.D., Physics** University of North Carolina, 2022

**M.S., Physics** University of Georgia, 2015

**B.S., Mathematics and Physics** Georgia College, 2010
